Forecast for Sunday 22 Oct 2023

Weather: Cloudy through the early morning, perhaps the occasional clear spell in the east. Cloud continues pushing in from the west through the morning, with the odd light shower at times. Cloud lifting and breaking up by lunchtime with sunny spells developing through the afternoon as showers ease off. Clear spells continuing into the evening may see misty patches begin to develop.

Chance of cloud-free hill tops above 600m: 80% early morning, rising to 100% into afternoon.

Low cloud and visibility: Cloud pushing in from the west mainly broken/scattered amounts of stratocumulus, with bases occasionally down to around 500-600 m through the early morning, lifting above summits by the afternoon. Visibility generally very good, falling to poor at times in any showers.

Meteorologist's View

Recent heavy rainfall likely to continue to have an effect on walking conditions, with saturated ground in places and some smaller watercourses possibly in spate. Note wind chill on higher slopes early.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Forecast for Monday 23 Oct 2023

Weather: Extensive mist and fog possible early on Monday, which could be slow to clear through the day. Some clearer, brighter spells possible through the afternoon, before cloud thickening and lowering into the evening ahead of a band of rain pushing up from the south.

Maximum wind: Easterly winds around 15-20 mph, with gusts up to 30 mph.

Chance of cloud-free hill tops above 600m: 30% through morning, rising to 80% through afternoon.

Low cloud and visibility: Mist and fog could be slow to clear, giving poor visibility across some hills and valleys. Aside from this, cloud generally staying comfortably above the summits through the daylight hours.

Temperature: **Valleys:** Plus 6 Celsius, rising to Plus 11 Celsius.
At 600m: Plus 6 Celsius, rising to Plus 8 Celsius.
Freezing level: Above summits.
